- Political Issues / Community Meetings
- Closures / Evacuations / Public Safety Issues
- Major Safety Concerns / Injuries / Accidents
- Critical Resource Needs
- Resources Available to Reassign/Share/Demob

Predictive Services:
Shelby Law

Moisture will increase northward again into central and northern Utah and eastern/southern Nevada, keeping thunderstorm and rain chances high again today (Thursday). Most storms will be wet.
The wind threat shifts north on Thursday, with gusty winds expected across the central Idaho mountains and across portions of south central and southeastern Idaho. RH is forecast to reach critical levels across central and southeastern Idaho by Thursday afternoon.
Moisture will continue to surge northward Thursday/Friday into parts of southeast ID/WY. Lightning will return to the northern half of Nevada by this weekend and into ID by early next week. This lightning looks to be a mix of wet/dry and we will continue to monitor for lightning coverage, timing and moisture.

GBCC Update: Emil Magallanes
